### SIMTEQ passes successful in-plant acceptance of Boeing 737NG Full Flight Simulator Lev D

Nieuw-Vennep, The Netherlands, August 18<sup>th</sup>, 2017 - Simteq announced today to have successfully passed the in-plant acceptance of their Full Flight Simulator for Boeing 737NG type of aircraft with full compliancy to acceptance criteria in line with all regulatory requirements for Flight Simulation Training Device as Full Flight Simulator Level D. The simulator will be disassembled in the coming weeks for shipment to its final destination where it shall provide training at the International Aviation Academy of Moscow, Russia.

“We are particularly pleased with this achievement as it is an important milestone for our company in providing the proper level of quality to the industry that will allow us to further consolidate our position within the commercial flight training market”, said Andrei Stepanov, Simteq’s CEO. “We are delighted to hear how our product exceeds expectations and look forward to hear feedback from future users”.

#### **About SIMTEQ**

SIMTEQ BV designs, manufactures and integrates fixed base and full-motion full-flight simulators for use in civil professional flight training. The SIMTEQ head office and main manufacturing and assembly facility is located in Nieuw-Vennep, The Netherlands, just minutes from Amsterdam Airport Schiphol.
